**Attachments:** HazCat Sheets.pdf; 1162\_C.JPG

Hello Anne,

Attached is a pictures and the hazcat sheet you requested that shows BYK's label on a fiber drum at the Site.

As for the action memo tables you are requesting, they are the analytical results that EPA has for the containers on the Site and unfortunately the type is very small. I do not have access to better or larger type for the results, however the non hazardous drum we are referring to was filled with trash. So I believe the analytical results would be pointless, since the drum we are referring to obviously does not contain any of those chemicals.

If you have any further questions feel free to call,

Bonnie,

I was told that Southern Clay Products had received a similar Request for Information but I have not actually seen it and it is my understanding that Southern Clay will ask its own counsel to follow up with you. There is a connection between the two companies but I am afraid that I do not know what it is – whether the two entities are under common ownership or whether there is some other relationship. I will pass on your request that BYK's SCP 104e response include that information.

regards  
Anne

Anne,

I just saw an email from our counsel Bill Tucker and he mentioned that your company also received a 104e for Southern Clay Products. Is there a connection between SCP and BYK? If not I will not include their information with the information for BYK. If there is a connection and you would like that information also, let me know and I will include it. If there isn't a connection, please state that in the SCP 104e response, have it notarized and send it back. Thanks, Bonnie

Hi Anne,

You may consider this email as an approval of your request for an extension of 30 days to March 16, 2014. I will get the pictures and any other information we have regarding Byk's connection with the Site and I will also send you the Action Memo's list of chemicals. I will not be in the office until Friday, so I will send it then. If you have any additional questions feel free to call me at 732-321-6647 or the number you called today.

Thanks, Bonnie Hriczko

**Subject:** BYK USA Request for Information/ Site ID No.: A23K, Superior Barrel and Drum, Elk Township, New Jersey

Dear Bonnie,

Thank you for the voicemail message. I appreciate all the detail you provided.

First, please process BYK USA's request for an extension of the 30 day deadline to respond to the Request for Information.

Second, please do send the photo of the drum and any other information that may be available and relevant to BYK's response. Would you include a legible copy of the list of chemicals found at the site? We have a copy of the tables attached to the Nov. 22, 2013 Action Memorandum but they are difficult to read.

Regards

Anne

Ms. Hriczko, we have talked a couple of times and in both calls you said you would send me an email confirming the extension of time for SCP to respond to the request for information. Unless I am missing something, at this point I have not received your confirmation email. Please confirm the extension. Thanks.

**Subject:** Request for Information - Extension Request - Superior Barrel and Drum Site

Ms. Hriczko, as we discussed, I am asking for a 45-day extension of time on behalf of Southern Clay Products (SCP) to respond to a letter dated January 9, 2014 from the EPA requesting information related to the Superior Barrel and Drum Site. As I explained, there have been various owners of the facility and it will take some time to respond to the information request.

Based on our telephone conference, my understanding is that EPA is willing to grant a 30-day extension to SCP until March 17, 2014. Please verify that the extension has been granted to SCP.

I would also appreciate any information you can provide, including pictures, test samples, and other documents, related to why EPA is sending the information request to SCP. Thanks.

*John L. Wilson*

**Subject:** Akzo Nobel Picture #2049

Hi Keith,

I sent the pictures of the 2 drums to Akzo Nobel and for whatever reason there was not a picture of the label on the above drum (2049). Akzo Nobel is requesting a picture of that drum, so would it be possible to take a picture of that drum for them? It does not need to be of such high quality. They are way too large and don't need to be that big. I was able to shrink them down to 900kb and they came through fine and were very legible. Thanks, Bonnie
